

Skill Match AI

Unlock Your Team's Hidden Superpowers

- Tired of secret skills being hidden at work?
- Skill Match AI is here to help connect talent with opportunities inside your company.

The Challenge: Untapped Internal Talent

Many employees have "hidden talents" or "secret skills" that are not known or utilized by their company.

This leads to:

- Missed opportunities for internal projects
- Underutilized employee potential
- Reduced employee satisfaction and engagement
- Inefficient resource allocation for mentorships and role assignments

Companies often hire externally while having the perfect candidate already on their team.

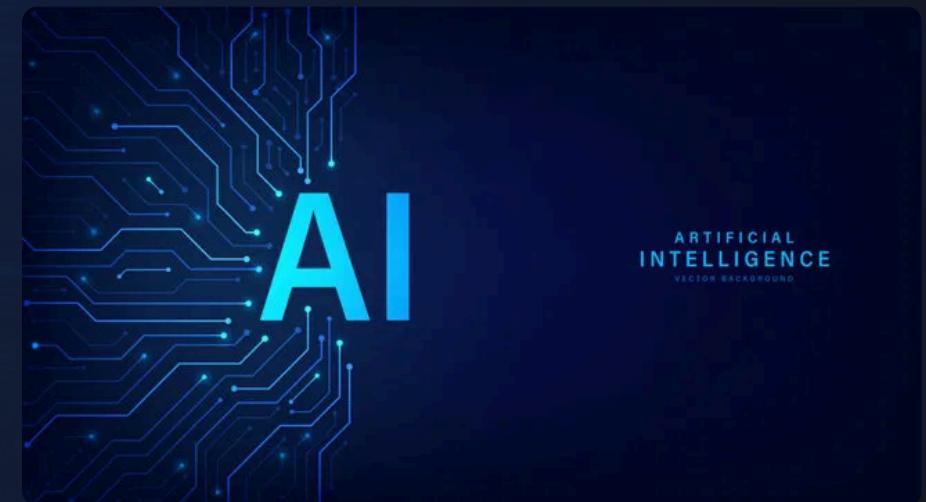

Introducing Skill Match AI

Your Internal Talent Dating App

Skill Match AI is a platform designed to connect hidden talents with opportunities within your company.

- 🏷️ **Tag your hidden talents** (coding, photography, project management)
- 🧠 **Smart matching** to connect you with projects or mentors
- 🏢 **Company-specific** - like LinkedIn, but for your company

"Think of it like LinkedIn, but specifically for your company, and way cooler."

Key Features: For Employees

Seamless User Experience

Sign Up/Login

- 1 Add your department, job title, and select your skills (e.g., problem solving)

View All Projects

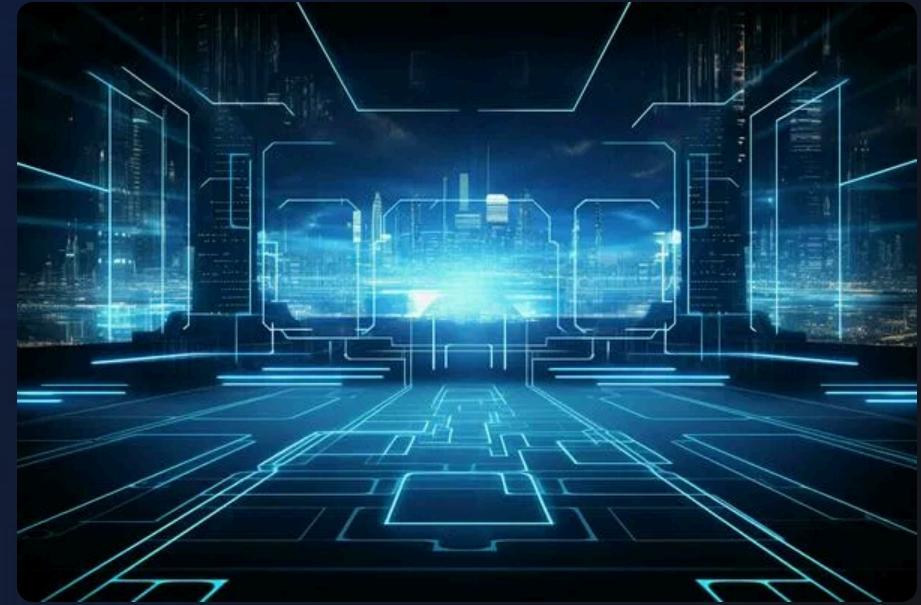

- 2 See a list of all projects in the system, hover over arrows to view required skills

Match Projects Option

- 3 View projects specifically matched to your skills, with automatically highlighted matched skills

Discover opportunities that align with your hidden talents

Key Features: Smart Matching & AI

Intelligent Connections

AI Co-pilot

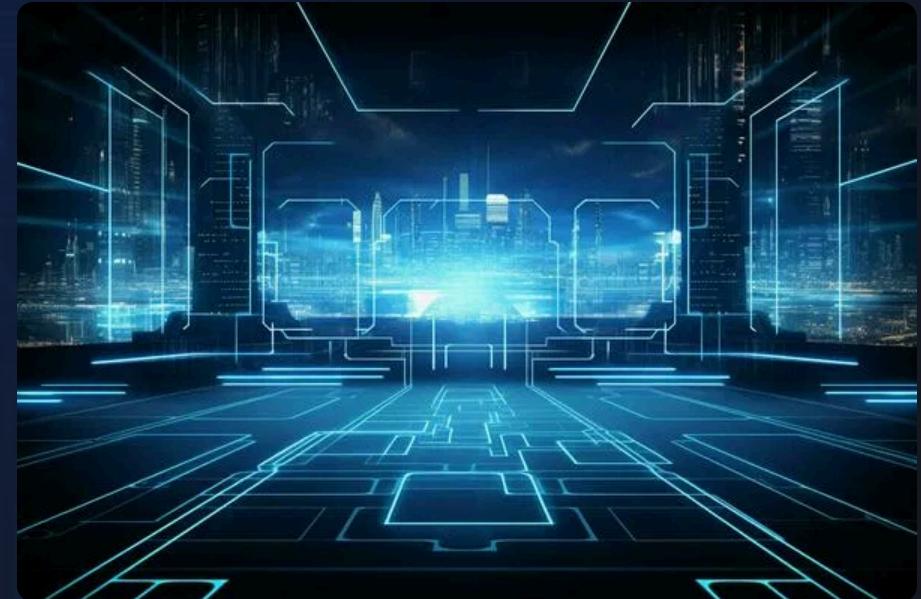

The system uses an AI co-pilot to show you exactly why you were picked for a matched open role or mentorship.

Automated Skill Matching

The application automatically identifies and types the matched skills from your profile to relevant projects.

Smart Recommendations

Get personalized project and mentorship recommendations based on your unique skill profile.

Key Features: For Managers

Chatbot for Data Access

Managers can leverage an intelligent chatbot interface to quickly access employee information and make data-driven decisions.

 **Employee Information:** Access detailed employee profiles, skills, and project history

 **Smart Search:** The chatbot can search the database to provide specific information like an employee's name, skills, or availability

 **Talent Analytics:** Get insights on skill distribution and identify talent gaps within teams

Make informed staffing decisions with real-time access to your company's talent pool.

Skill Match AI Chatbot

Who in the design team has experience with UX research?

I found 3 employees in the design team with UX research skills:
- Sarah Johnson (4 years experience)
- Michael Chen (2 years experience)
- Priya Patel (3 years experience)

Is Michael available for a new project starting next month?

Michael Chen will complete his current project on the 25th of this month and has no scheduled projects after that. He would be available for a new project starting next month.
